

MARIE MONIER

PROCESS ENGINEER / INDUSTRIAL PROJECT ENGINEER

+33 6 03 23 65 59 · MONIER.MARIE@LIVE.FR · REIMS, FRANCE · DRIVER'S LICENSE

Specialized in industrial project coordination and digital manufacturing, shaped by 3 years at Stellantis and immersive experiences in Germany and Spain. Comfortable in multicultural and cross-functional environments, I am looking to continue this international journey in Japan, whose industrial rigor and attention to detail I deeply admire.

EDUCATION

EiSINE – Engineering Degree
Electrical Engineering & Robotics
2022 – 2025

University of Reims
Bachelor's degree in Electronics,
Electrical Energy & Automation
(EEEE)
2019 – 2022

SKILLS

Soft Skills

Intercultural adaptability, Team spirit, Resilience, Discipline, Autonomy, Initiative

Vision & Quality

Industrial vision, quality control, metrology, SPC

Automation

Universal Robots, Fanuc, PLC/HMI APIs, robotic integration

Programming

Python · C · SQL · Power Apps

CAD & Tools

SolidWorks, Catia V5, Fusion 360, Eagle (PCB), MS Project, AutoCAD

Methods

Continuous improvement, problem-solving, process reliability

LANGUAGES

French – C2

English – C1 / TOEIC 925/990

Spanish – B1

Japanese – Beginner (self-learning)

HOBBIES

Muay Thai: 8 years of practice

Japan: culture, lifestyle, automotive

Design/3D Printing

EXPERIENCE

Stellantis – Sept. 2022 – Present

Project Engineer (Permanent Contract) – Charleville, FR

- Coordination of industrial projects from definition to validation, ensuring quality, cost and timing targets in a high-volume foundry, with a focus on ROI & operational efficiency
- Key interface between production, quality, maintenance, and partners; integration of innovative technologies (AI, vision, robotics)

Key achievements:

- Automatic distribution of ceramic filters (Universal Robot + vision sensor) → €43k/year · 1 FTE · ROI < 12 months
- AI inspection of complex parts → €172k/year · 4 FTE · scalable solution
- Multi-line quality vision systems + process vision applications → €301k/year · 7 FTE
- Logistics flow optimization + Power Apps tool (operator checklists) → €70k/year · strengthened process compliance

Total impact: ~€580k+ in annual savings generated

Industrial Design Engineering Internship – Vigo, Spain

- Implementation of torque control systems (torque wrenches) on automotive production lines
- Full immersion living with a local family: rapid integration into a new team and work culture, full autonomy in Spanish and English
- Development of genuine intercultural fluency and the ability to adapt to different working environments while remaining fully operational

French Robotics Cup | 2023 – 2025

- PCB design, embedded programming, system integration in a multidisciplinary team under tight constraints (deadlines, budget, competition)
- Communication management, sponsor negotiations, social media, student event organization
- 16th/110 (2024) · 22nd/126 (2025)

Comet YXLON GmbH, Hamburg | May 2019

- Maintenance of industrial X-ray systems for defect detection
- First solo professional experience abroad, living with a local family : confirmed passion for industry and international environments, and revealed ease in multicultural contexts
